About the State

Rajasthan has emerged as the largest State of Indian Union, covering an area of 3.42 lakh Sq. Kms. Rajasthan is situated in the north – western part of the Indian Union (23°30' and 30° 12') North latitude and 69° 29' and 78° 17' East longitude. It constitutes about 10.41 percent of the total area of the country and is situated in the north western part of the country sharing geographical boundaries with the State of Punjab, Haryana, Uttar Pradesh, Madhya Pradesh and Gujarat. It also has long international borders 1070 Kms. with Pakistan. It is a diverse State. The region of the west and north-west comprising 11 Districts spreading in 61.11 percent of the total area is either desert or desert which forms the Great Indian 'THAR' Desert. The state receives deficient rainfall and normally experiences drought conditions. Rich cultural and historical heritage of the State gives it the status of Country's most attractive tourist destination. In respect of minor and major minerals combined, State enjoys the status of second richest states in the country. The state is the leading Producer of oil seeds, spices, Guar and Maize. High production of milk has resulted in rapid growth of organized modern dairy sector. Rajasthan has been one of the favourite destinations in India for both domestic and foreign tourists

The result of oil exploration in the western 'THAR' region of the state has opened up new vistas for establishment of units based on the Petrochemical and allied products. Some facts about the state is as under;

PERFORMANCE

2013-14

PERFORMANCE 2013-14

4.1 Entrepreneurship Development Programmes:

The Institute is focusing for development of MSMEs in this region by motivating the educated unemployed youths towards self-employment. Institute has organized most of the ESDPs & EDPs for weaker section, SC/ST. ESDPs on Computer Hardware, Repair Maintenance of Mobile Phone, Beautician for women, Leather items, Herbal cosmetics, Chemical products, Items & Jewellery, Bio-Technology, Audio Video editing, Data processing, Fashion designing etc. at various locations in the state. 50% of the ESDPs are on workshop based, to equip the youth with some machining work. It is vital to mention here that the Govt. of Rajasthan is focusing on E-governance; therefore computer hardware enjoys vast potential even in the remote and far flung area in the state.

The Complete details of programmes like ESDPs, EDPs & MDPs organized by the institute under Govt. section & other programmes under the PD A/c during the year 2013-2014 are given below; The institute has also initiated action for regular follow up with the successful EDPs/ESDPs trainees to get the feed-back about the efforts made for setting up self-employment ventures.

14. MSE Clusters and the Perspective for their Development

According to UNIDO, a cluster can be defined as a sectoral and geographical concentration of enterprises, faced with common opportunities and threats which can give rise to external economics, favour the emergence of specialized technical, administrative and financial services and create a conducive ground for the development of the inter-firm cooperation among public and private local institutions to promote local production, innovation and collective learning.

The presently adopted approach for cluster development consists of drawing lessons from the experience of successful clusters and then implicating them through building up of local capabilities with the active participation of various cluster actors like Micro/SSI units, "Industry Associations, business

Development Service Providers, Policy Markets etc. The process of cluster development usually consists of the following steps:

1. Selection of cluster.
2. Selection of Cluster Development Agent.
3. Diagnostic Study.
4. Preparation of Action Plan for intervention
5. Approval of the project and release of funds through leveraging.
6. Implementation of trust building between Cluster Actors and Development Agent.
7. Monitoring and Evaluation
8. Self Management Phase.

15. Significance of Cluster Approach

International experiences, show that small firms are unable to face competitive pressures because of their isolation and ineffective linkages with relevant support organization and commercial services providers, whereas the cluster of MSMEs bound together in strong and dynamic networks and relying upon strong linkages with relevant local/material support institutions, have proved competitive in the global context.
